Pre-final year | B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **May 2028**

Intern – Technology — GEP Worldwide | Open to **Hyderabad / Mumbai**

Education

SVNIT Surat	B.Tech — Artificial Intelligence	9.20/10	2024–Present
Shiv Jyoti Convent School, Kota	Class XII (CBSE)	95.80%	2024
St. Joseph’s College, Prayagraj	Class X (ICSE)	97.20%	2022
<i>Coursework:</i> Object-Oriented Programming, DBMS/SQL, Data Structures & Algorithms, Design & Analysis of Algorithms, Operating Systems, Computer Networks, Software Engineering, Computer Organization & Architecture.			

Experience

Software Engineering Intern	<i>Jun–Jul 2025</i>
<i>IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj</i>	
- Built production tools with Node.js, Express, and MySQL that automated 50+ daily operational workflows for plant stakeholders. - Developed 10+ REST APIs with input validation, SQL queries, and structured error handling; debugged broken flows using logs and stack traces. - Used Git, Docker, and CI/CD before deployment; wrote short docs and updated mentors/managers on progress and trade-offs.	

Projects

LogiFlow — Supply-Chain Routing (Google Solution Challenge 2026, Global Top 106)	<i>Apr–Jun 2026</i>
<i>Python, FastAPI, TypeScript, Next.js, Redis, SQL, GCP Cloud Run, pytest</i>	<i>GitHub / Live</i>
- Technical Co-Lead: ranked logistics corridors on time, cost, and delay risk so operators could pick a route under real constraints—580+ corridors from 15,000+ train-day operational records. - Built SQL/Python pipelines to clean, join, and validate those records; FastAPI + Next.js so ranked routes were queryable in a live app. - Cached hot corridor reads in Redis (100–400 ms) on GCP Cloud Run; pytest suite with 100/100 business-rule checks so broken pricing/routing logic fails in CI before release.	
Community Hero — Vibe2Ship 2026 (Global Top 20)	<i>Jun 2026</i>
<i>TypeScript, React, Express, Firebase, Gemini API, GCP Cloud Run</i>	<i>GitHub / Live</i>
- Solo-owned end-to-end delivery: React/Express app, Firebase/Firestore data model, Cloud Run deploy, and live demo for a global Top-20 finish. - Integrated Gemini API for report categorization with guard checks so bad model output does not break routing; validated empty/noisy submissions before they hit the model.	
Career Automation Stack — Internship Scout, Hiring Scout, OA Forge	<i>Jun 2026–Present</i>
<i>Python, TypeScript, Next.js, C++17, PostgreSQL/Supabase, GitHub Actions</i>	<i>GitHub</i>
- Solo-built scheduled pipelines: Internship Scout over 966 companies (ingest → dedup → HTML digest email) and Hiring Scout over 10.7k+ public contacts (8.7k+ outreach-ready) with rate-limited SMTP—8 GitHub Actions workflows. - OA Forge: company-specific OA practice with 14k+ evidence-tracked questions, 5.5k+ test cases, a hybrid C++ judge (g++, subprocess limits), and timed mock sessions.	

Skills

Cursor	Daily Agent/Composer (primary IDE). 28k+ Python LOC, 446 commits; I spec and review every merge.
MCP / plugins	GitHub, Supabase, Vercel, Firebase, Redis, Stitch, Miro .
Languages	C, C++, Python, Java, SQL, TypeScript, JavaScript
Core CS	OOP, DBMS/SQL, DSA, Operating Systems, Computer Networks
Backend & Data	REST APIs, FastAPI, Node.js/Express, MySQL, Redis, PostgreSQL/Supabase, Firebase/Firestore
Frontend & Deploy	React, Next.js, GCP Cloud Run, Docker, GitHub Actions, CI/CD, Linux basics, Git, pytest
Applied AI	Gemini API with input/output guard checks.

Achievements & Leadership

Chairperson, Nexus SVNIT (Aug 2026–Present): own planning and delivery of departmental tech initiatives—workshops, contests, and mentoring for 500+ students; journey Member → Social Media Coordinator → Academic Mentor → Technical Representative → Chairperson over 2 years LeetCode Knight: peak 2048, 750+ solved, 32 contests; Codeforces Specialist: 1419, 270 solved McKinsey.org Forward Fellow (2026)
