Pre-final year | B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **May 2028**

Software Development Engineer Intern — May 2027 (2 month) | Open to Bengaluru

Education

SVNIT Surat	B.Tech — Artificial Intelligence	9.20/10	2024–2028
Shiv Jyoti Convent School, Kota	Class XII (CBSE)	95.80%	2024
St. Joseph's College, Prayagraj	Class X (ICSE)	97.20%	2022
<i>Coursework:</i> Data Structures & Algorithms, Object-Oriented Design, DBMS/SQL, Operating Systems, Computer Networks, Software Engineering, Design & Analysis of Algorithms. Available for May–Jun 2027 internship (graduating May 2028).			

Experience

Software Engineering Intern

Jun–Jul 2025

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj

- Owned design-to-deployment of production tools (**Node.js**, **Express**, **MySQL**) that automated **50+** **daily** operational workflows for plant stakeholders.
- Built **10+** **REST APIs** with input validation, SQL queries, and structured error handling; debugged broken flows using logs and stack traces.
- Practiced SDLC basics with **Git**, **Docker**, **CI/CD**, peer code review, and short technical docs for mentors/managers.

Projects

LogiFlow — Google Solution Challenge 2026 (Global Top 106)

Apr–Jun 2026

Python, FastAPI, TypeScript, Next.js, Redis, SQL, GCP Cloud Run, pytest

GitHub | Live

- Technical Co-Lead: designed scalable REST services and a Next.js frontend; deployed backend on **cloud-native** GCP Cloud Run with Redis caching (**100–400 ms** hot-path reads).
- Built SQL/Python pipelines over **15,000+** train-day records; wrote a **pytest** suite with **100/100** business-rule checks so broken logic fails in CI before release.
- Documented APIs and trade-offs for teammates; collaborated across frontend/backend to ship a multi-service product under contest timelines.

Community Hero — Vibe2Ship 2026 (Global Top 20)

Jun 2026

TypeScript, React, Express, Firebase/Firestore, Gemini API, GCP Cloud Run

GitHub | Live

- Solo-owned full lifecycle: design, build, Cloud Run deploy, and ops for a civic reporting PWA—geo-tagged reports, admin review, and analytics.
- Integrated **GenAI** (Gemini) for report categorization with guard checks; used NoSQL (**Firestore**) plus validation for empty/noisy submissions.

AirHelp — PowerMind Hackathon 2026

2026

Python, FastAPI, React, WebSockets, RAG

GitHub

- Built a FastAPI backend and React UI for airport-style Q&A with a retrieval pipeline; added **WebSocket** channels for live-style alerts.
- Load-tested at about **50–100** concurrent users (**1–3s** latency) and fixed bottlenecks found during the hackathon.

Skills

Languages: C++, Python, Java, TypeScript, JavaScript, SQL, C

Core CS: Data structures, algorithms, OOP/design principles, DBMS, OS, networking

Backend & Cloud: REST APIs, FastAPI, Node.js/Express, MySQL, PostgreSQL, Redis, Firebase/Firestore, Docker, CI/CD, Git, Linux

Practices: Debugging & troubleshooting, code review, technical documentation, GenAI-assisted development, SDLC

Achievements & Leadership

- Chairperson, Nexus SVNIT** — head the departmental technical cell; organize workshops, coding contests, and mentoring for **500+** students
- LeetCode Knight:** peak **2048**, **744** solved, **32** contests; **Codeforces Specialist:** **1419**, **265** solved
- Google Solution Challenge 2026** — **Global Top 106**; **Vibe2Ship 2026** — **Global Top 20**
- Executive Member, ACM SVNIT**; **McKinsey.org Forward Fellow (2026)**
